# SANITIZERS AND DETERGENTS FOR WORK ENVIRONMENT

Dear Customer,

we understand that your business is operating under unique circumstances during this difficult time and that your essential work must go on. This is why we are here for you and have worked non-stop with our Research and Development Department to increase the sanitizing effect of some of our existing portfolio products in order to limit the spread of COVID-19 in your working environment.

We would also like to underline that increased frequency of cleaning of general room and manufacturing site surfaces, reduces the presence of the virus and the risk of contact in any environment where the transfer of germs is a concern.

We know that the most important thing to you is to maintain a safe environment for your co-workers so we are pleased to inform you that Lubra can provide you with the following products:

## **ERGOHYGIEN C 19**

### **SANITIZING AGENT CONTAINING BENZALKONIUM CHLORIDE**

Ready to use sanitizing technological solution for all hard surfaces.

ERGOHYGIEN C 19 is a ready-made solution that does not need to be diluted.

It can be nebulized by using its practical refillable pump sprayer or a common manual sprayer.

ERGOHYGIEN C 19 is a non-toxic product with a pleasant scent that enhances the perception of cleanliness.

Available packaging: 5 kg and 20 kg

With a 20 kg minimum order, the practical pump sprayer is included - (see image).

---

## **DETERGENE LP PLUS**

### **INDUSTRIAL FLOOR CLEANER DETERGENT**

Specific product with a high detergent and sanitizing power specifically developed for industrial floor cleaning. Its improved formula solubilizes dirt and removes germs on contaminated surfaces.

With a proper use of DETERGENE LP PLUS you will accomplish the guidelines drawn up for people who work in or run offices when it comes to the 'keeping your workplace clean' point.

The product is non-toxic, non-flammable and suitable for all floor types.

Very economic and effective, starting from a 5% dilution.

Low-foaming formula especially developed for scrubber dryer machines.

Available package: 20 kg

## **ALKAHYGIEN 3400**

### **INDUSTRIAL SANITIZING DEGREASING DETERGENT**

Highly-effective sanitizing degreaser to use as it is for heavy-duty dirt or with a 10% dilution for the removal of greases and lubricating oils deriving from machining processes.

ALKAHYGIEN 3400 can be nebulized with a common hand sprayer or applied with a cloth or brush using cold or hot water.

ALKAHYGIEN 3400 has an extremely low saline residue and does not leave white stains after drying

Available package: 20 kg
