

Technical Data Sheet

DIVINOL MOTORSÄGENREINIGER FORTE

Description:

DIVINOL MOTORSÄGENREINIGER FORTE has got following advantages:

- the product is a diluted, alkaline cleaner free of phosphate and is therefore not harmful to the environment.
- it is biodegradable (according to OECD test)
- it does not attack the material such as laquer and metal or synthetic materials
- it cleans very effective the soilings on the chain and the housing of the motor saw

Nominal values:

apperance	light yellow fluid
compound	anionic and nonionic tensides, silicat, alkali, and accessory agents
density	approx. 1,08 g/cm ³
pH-value in the concentrate	approx. 13
10% concentration	approx. 12
1% concentration	approx. 10

Application:

Depending on the soilings the product can be used pure or deluted with water (1:5).

The dirty parts should be sprayed with saw cleaner and then be left for 5-20 minutes. A paint brush can be used to clean the parts. After this the parts should be rinsed with water, if possible with high pressure, and at last the parts should be dried with compressed air.

If the parts are very dirty they should lay in the cleaner for several hours and then be rinsed with water before being dried with compressed air or with a cloth.
