MOLYDUVAL Soraja RSM 2

Food Grade Grease for Direct Food Contact (3H)

A clear special grease with good adhesive properties. Suitable as sealing grease for taps and valves, but also for bearings and joints. Due to its purity, it can be used for lubrication in the food industry, even in direct contact (3H).

Properties

- * food grade all components conform to USDA H1 or FDA regulations for Lubricants in incidental food contact
- * harmless
- * good tackiness
- * withstands many alcohols and acids
- * good resistant against cold and hot water, even sea water
- * Food-grade, meaning that all ingredients comply with FDA or similar regulations for the use as a release agent in the food industry (3H)

Applications

- * for chains in food industry, for packing and filling machines
- * for slide bars in butcheries or slaughterhouses
- * as corrosion preservative
- * for conservation and lubrication of wire ropes
- * for sealing
- * for hooks, sleeve elements, rolls, joints, clutches
- * as release agent in food industry

Technical Datas Color transparent Consistency Class NLGI 0,1 mm ca. 2 Name M2R-20 Base Fluid White Oil Name ISO-L-XBFEA2 Density 15°C kg/m³ 900 Water Resistance static Grade 0 Temperature Range °C -20 -> +180 **Dropping Point** °C The indicated service temperatures are guide values depending on the lubricants composition and on the application. They may vary in case of special influences or ongoing use.

The content of this manual is based on our current knowledge and experience in the development and manufacture of lubricants. Because of the complexity of tribological systems, the effect of our products depends on many parameters, which we cannot assess and which influence we cannot evaluate. For this reason general statements about the function of our products are not possible. The information in this manual, therefore, contains non-binding guidelines, which should give the technical trained reader information on possible applications. The information in this manual does not include property assurances or warranties or guarantees to the properties or suitability of this product in a specific application. Prior to its use it is absolutely necessary to test this product in the application to ensure that the product and its use is safe, economical and fully suitable. It should proceed with due diligence.
