

MOLYDUVAL

Soraja TLM Spray

PTFE Dry Film Lubricant for Food Industry

An effective dry lubricant for applications under extreme conditions such as high pressures or high temperatures.

Properties

- * good anticorrosive properties
- * reduces wear and friction
- * very good tackiness
- * low friction coefficient
- * rejects dirt
- * anthält Haftvermittler

Applications

- * as separating agent for moulds
- * for preservation of metals and machines in food industry
- * for bearings in precision engineering, for for-life-lubrication
- * as sliding agent for wood
- * as separating agent for soft plastics
- * for coating plastics
- * for chains in food industry, for packing and filling machines
- * for lubrication point in food and pharmaceutical industry
- * for plain bearings in food industry
- * for zips

Technical Datas

Color		white
Basis		PTFE
Temperature Range	°C	-180 -> +240
Unit	ml	400

The indicated service temperatures are guide values depending on the lubricants composition and on the application. They may vary in case of special influences or ongoing use.

The content of this manual is based on our current knowledge and experience in the development and manufacture of lubricants. Because of the complexity of tribological systems, the effect of our products depends on many parameters, which we cannot assess and which influence we cannot evaluate. For this reason general statements about the function of our products are not possible. The information in this manual, therefore, contains non-binding guidelines, which should give the technical trained reader information on possible applications. The information in this manual does not include property assurances or warranties or guarantees to the properties or suitability of this product in a specific application. Prior to its use it is absolutely necessary to test this product in the application to ensure that the product and its use is safe, economical and fully suitable. It should proceed with due diligence.
